SUMMARY

Highly motivated Computer Science graduate from Cairo Higher Institute for Computer Science and Information Technology. Passionate about Artificial Intelligence and Software Engineering with a proven ability to develop end-to-end applications. Skilled in integrating AI models with modern web and mobile frameworks using Python, Flask, and Flutter.

EDUCATION

Cairo Higher Institute for Computer Science and Information Technology Graduated 2025
Bachelor of Computer Science and Information Systems
Relevant Coursework: Artificial Intelligence, Neural Networks, Database Management, Software Engineering.[cite: 3]

TECHNICAL SKILLS

- **Programming:** Python (Advanced), Dart, SQL, C++, Java, JavaScript.[cite: 3]
- **AI & Machine Learning:** LangChain, Google Gemini API, TensorFlow, Scikit-learn, NLP.[cite: 3]
- **Frameworks & Web:** Flask, Jinja2, HTML5, CSS3, RESTful APIs, Flutter.[cite: 3]
- **Tools:** Git/GitHub, MySQL, SQLite, LaTeX, Docker, Microsoft Office.[cite: 3]

CORE PROJECTS

AI-Powered E-Commerce Platform (Graduation Project) 2024 – 2025

- Engineered an E-commerce solution with an AI Shopping Assistant using **Google Gemini API** and **LangChain**. [cite: 3]
- Developed a robust **Flask** backend and managed complex relational data using **MySQL**. [cite: 3]
- Implemented **ConversationBufferMemory** to maintain context-aware dialogue for users. [cite: 3]
- Built a cross-platform mobile interface using **Flutter** and a web dashboard via **Jinja2**. [cite: 3]

Image Classification & Recognition System 2023

- Designed a Convolutional Neural Network (CNN) for multi-class object recognition using TensorFlow. [cite: 3]
- Optimized hyperparameters and data augmentation to achieve high accuracy on test datasets. [cite: 3]

EXPERIENCE

Freelance Software Developer 2023 – Present

- Developing custom automation scripts and small-scale web applications for local businesses. [cite: 3]
- Providing technical consultation on integrating AI features into existing software workflows. [cite: 3]

SOFT SKILLS

Problem-Solving: Debugging complex code and optimizing algorithms. | **Teamwork:** Collaborating via Git. [cite: 3]
Continuous Learning: Adapting to new technologies like Generative AI, LLMs, and modern IT roadmaps. [cite: 3]
